

Preface

We, the technical pupil of engineering college, SK university proudly present our first monumental work, aeon we present this magazine as our first edition in a motto to serve the requirement of every graduate. Unlike many other traditional college magazines this magazine presents perspectives for a graduate concerned with professional advancement and enlightening every graduate in the latest trends and enlightenments presenting in this engineer's era. It gives an overview of the latest paper presentations which are going to be held at different engineering colleges. Tips have been suggested to help every graduate as per his requirements towards aptitude communication skills, attitude

development to face any campus interview.

Ace

ACE- Activity Club of Engineers

An innovative approach for all-round development of students of sku college of engineering and technology. This club is designed and formed for making the students to cope up to present trends in technologies and emerging modern world.

ACE will be conducting many activities and exercises for the best exposure to the social world. This club has vast links and contacts with many personalities for better guidance.

ACE is an self supporting club and well defined community with a perfect body-

Hmmm.....interesting

Hi friends...

Spend 2 mins... this for your safety.....

VERY USEFUL INFORMATION

If any robber catches you and you are forced by the robber to withdraw money from an ATM machine, you can notify the police so smartly by entering your Pin Number in reverse. For example if your pin number is 1234 then you would put in 4321. The ATM recognizes that your pin number is backwards from the ATM card you placed in the machine.

The machine will still give you the money you requested, but unknown to the robber, the police will be immediately dispatched to help you.

This information was recently a broadcast on TV and it states that it is seldom used because people don't know of its existence.

Sleeping may earn you \$10 per hr

It's no more necessary to get up early in the morning and get ready for work, for NASA is paying people just to sleep.

Well, the U.S. space agency is paying 10 dollars per hour to the subjects participating in its bed rest study, which requires them to spend three consecutive months in bed.

The participants will be paid about 17,000 dollars over the course of the study, which is carried out at the University of Texas.

They spend three months lying down, and the preparation and rehabilitation take up another month.

The study is aimed at finding ways to minimize the debilitating impact of zero gravity in space, which can cause reduction in muscle mass and bone density.

NASA's Flight Analog Research Unit says one way to recreate such conditions on the ground is for test participants to lie down with head slightly tilted back for 90 days.

Experts behind the project say that the participants in their bed-rest study are providing valuable information for the space program.

"It's very relaxing at times. This is probably the most I've sat still in 10 years," foxnews.com quoted Heather Archuletta, a study participant, as saying. (ANI)
